

Dekunu Oasis

This fortified oasis provides water and shelter to caravans between Zanesh and the coast.

The caravanserai on the eastern plateau has been expanded to a fortified outpost.

It now includes a temple to the Sun Goddess, several traders and craftsmen, as well as tents for visiting desert shamans who still consider the oasis a holy place.

The former slave gnomes living on the western plateau have created their own enclave after having attained freedom.

In addition to regular shops and traders, the enclave includes its own well, an inn, a skilled healer, a potions and talisman shop and a temple to the gnomes' „god family“.

The gnome enclave is even more fortified than the eastern side, with quick release rope bridges connecting the buildings and „non visitor rooms“ having a very low ceiling, giving the gnomes an advantage in defending them.
