

dungeon

room 1) a small chest hidden behind the stalagtite.

Stone door leading down to room 3. Careful, the ramp numbered 5 is slippery !

Room 2) a rope and wood path leads to this rectangular room.

The small stone pedistal will chime when approached. If you listen quietly, the stone block might whisper to you.

Room 3) locked stone door blocks the entrance. The low walls actually go all the way up to the celining, this is a cut away view.

Three crates, they look like new. How could that be ?

Room 4) small rectangular room.

Two crates, but are they full of treasure ?

Behind the stalagtite could be a fossilized hand holding a dagger.
