

On a lonely and forgotten path, between the Lonely Lighthouse and the enigmatic village of Salt Gatherers, lies Wagon Stop, a place shrouded in mystery and a sinister attraction for the few travelers who dare to pass through it. Over several generations, the Vice family has put down roots in this wilderness, transforming it into a dark refuge where the winds whisper secrets that they keep hidden from the world.

Don Johnson, the enigmatic patriarch, observes the world with eyes that have accumulated more knowledge than they could possibly share. He lives with his wives, two cousins from Lonely Hamlet, whose blood ties weave an oppressive air around them. His children, Philip Michael and Saundra Santi, live in adjacent houses, like shadows of a legacy that oscillates between fear and fascination.

Wagon Stop is more than just a stopover; it is a land of ancient and forbidden pacts. Behind the strange and almost oppressive hospitality lies a dark deal with underworld beings. In exchange for protection and wealth, the Vice family hands over the life energy of the unwary travelers who stop there. As the travelers make their way, few escape without feeling as though they have been touched by a secret they wish they had never known.
