

ruins south of Yonder Pond

Greenish buildings, must be moldy.

- 1) the old tower, tree growing close to it.
- 2) two walls left, cracked ground
- 3) four partial walls, tree growing into the building. Might have been a house at one time.
- 4) two walls barely standing, shrub growing inside.
- 5) an old well. Looks like something comes out of the well and wanders about the ruins.

Either something growing in the 7) garden, wandered around, and went into the well. Or something came out of the well, wandered around for a bit, and stopped at the garden.

- 6) some reddish weeds... they appear to almost be in formation.
- 7) the previously mentioned garden
- 8) a tree that appears to be an autumn tree, even in the spring.
- 9) a reddish tree in several locations. Sometimes move when there is no wind.
